Amendments to the Claims

Claim 1 (Currently amended): A <u>computerized</u> method of creating a program management chart comprising the steps of:
    displaying a plurality of tasks within a selected set of data as a first part of the program management chart; and
    displaying a task that is outside of the selected set of data but that is associated with at least one of the plurality of tasks within the selected set of data as a second part of the program management chart.

Claim 2 (Original): The method of claim 1 further comprising the step of differentiating between the plurality of tasks within the selected set of data and the task that is outside of the selected set of data.

Claim 3 (Original): The method of claim 1 wherein the task that is outside of the selected set of data is outside of a project that contains the selected set of data.

Claims 4-11 (Cancelled)

Claim 12 (Currently amended): A <u>computerized</u> method of creating a program management chart comprising the steps of:
    accessing a subset of data within a project;
    displaying a plurality of tasks associated with the subset of data; and
    displaying a task that is outside of the subset of data.

Amendment B
Page 5

Claim 13 (Original): The method of claim 12 wherein the task that is outside of the subset of data is a task within the project.

Claim 14 (Original): The method of claim 12 wherein the task that is outside of the subset of data is a task outside of the project.

Claim 15 (Original): The method of claim 12 further comprising the step of accessing a header relating to the task that is outside of the subset of data.

Claim 16 (New): The method of claim 1 further comprising accessing header data associated with at least one of the plurality of tasks within the selected set of data in order to display the task that is outside of the selected set of data.

Claim 17 (New): The method of claim 12 further comprising accessing header data associated with at least one of the plurality of tasks within the subset of data in order to display the task that is outside of the subset of data.
